

What is claimed is:

1. A portable electronic apparatus including a display and allowing a user of said portable electronic apparatus to select a function, comprising:

a plurality of keys associated one-to-one with a plurality of guide areas included in said display; and

control means for displaying, in each operation step, particular operation items which can be selected by the user in said plurality of guide areas, and executing, when any one of said plurality of keys is pressed, processing relating to one of said operation items appearing in one of said plurality of guide areas associated with the key pressed.

2. An apparatus as claimed in claim 1, wherein said apparatus comprises a handy phone.

3. A portable electronic apparatus comprising:

storing means for storing, for each of a plurality of functions, operation items which can be selected by a user operation step by operation step;

a display including a plurality of guide areas each for displaying respective guidance information representative of an operation item which can be selected by the user;

a key input section including a plurality of keys associated one-to-one with said plurality of guide areas; and

control means for managing a progress of the operation step, and displaying, in each operation step, the guidance information
